A Data Structures and Algorithms Learning App

Problem Statement

DSA learning resources are often **scattered** across different platforms.

Students may find it difficult to follow a **proper learning path**.

There is usually no simple way to **track learning progress**.

This app solves these issues by providing **everything in one platform**.

Purpose of the App

To provide
structured DSA
learning material

To help students
practice with
quizzes

To provide
full-length
mock tests

To track student
performance and
progress

To allow admins to
manage topics and
quizzes

Core Features

DSA App Functional Modules

Secure Platform

Topic-wise Learning

Detailed Topic Explanation

Quiz Module

Mock Test Module

Progress Tracking

User Profile Management

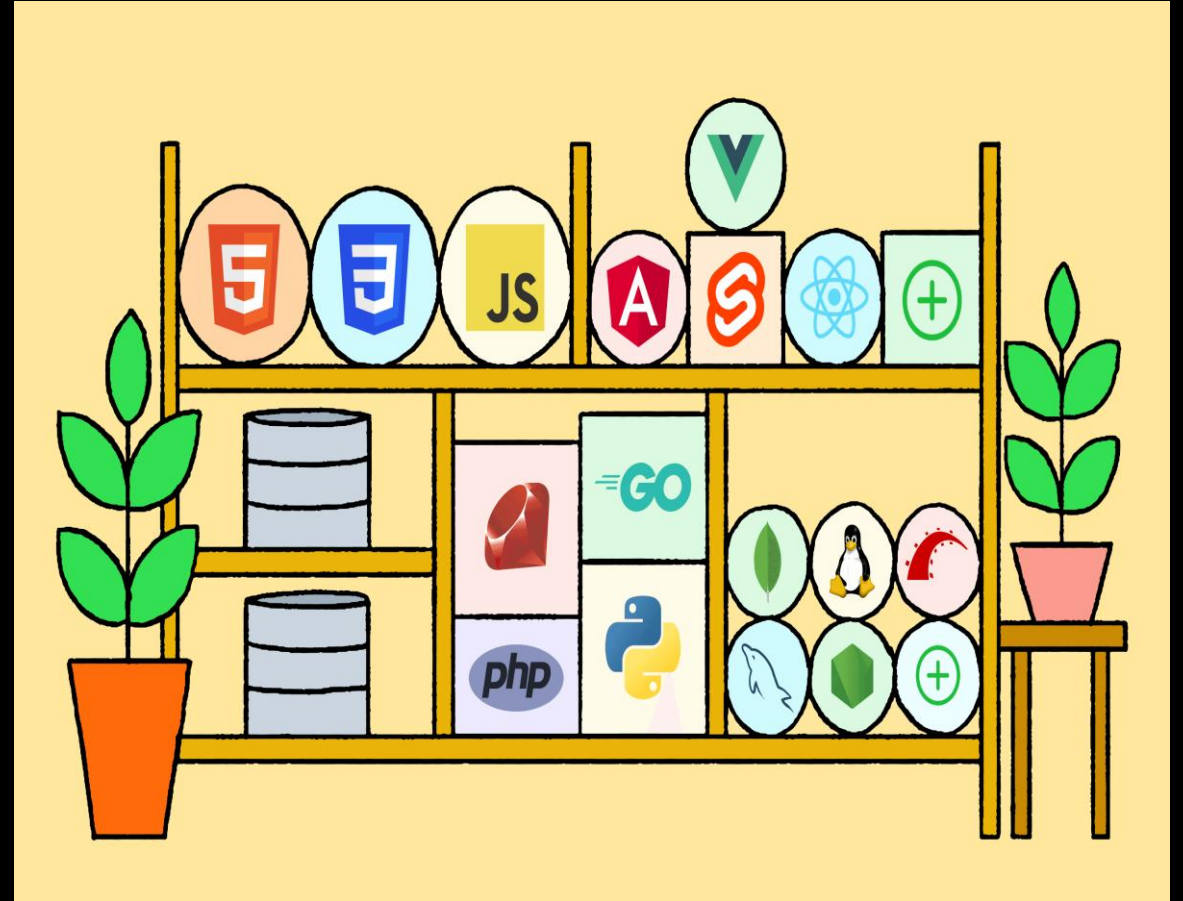

Admin Dashboard

Topic & Quiz Management

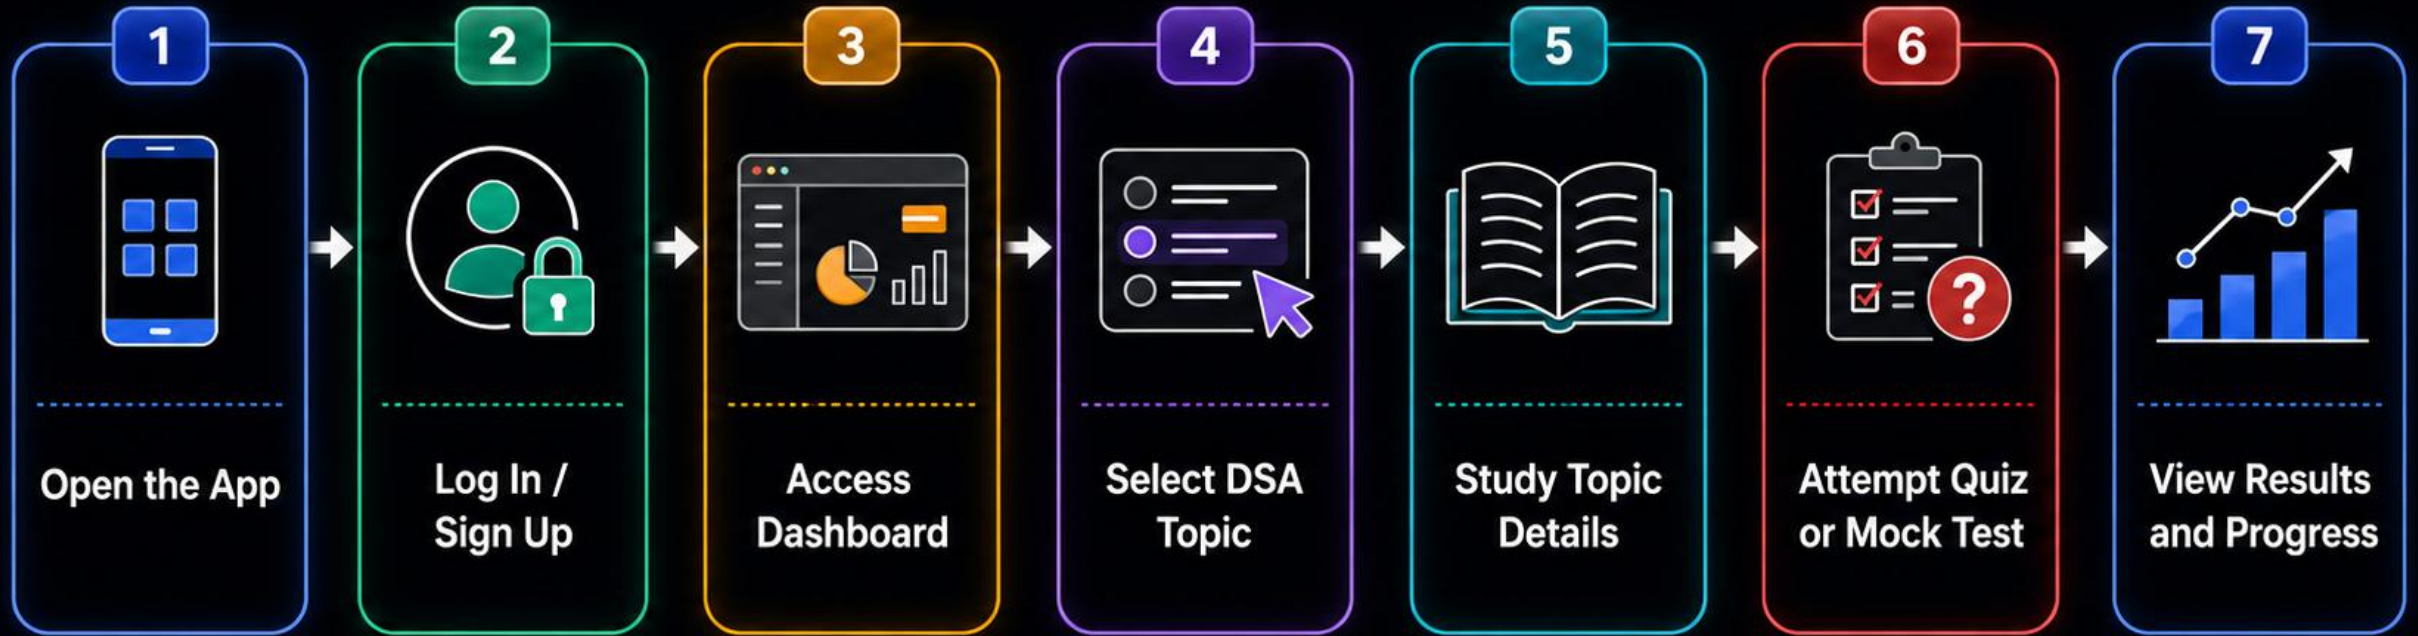

Tech Stack

- **Frontend:** React Native with Expo
- **Backend:** Node.js with Express.js
- **Database:** MongoDB
- **Authentication:** JWT Authentication
- **UI Components:** Material UI Icons and Buttons
- **Animations:** AOS and Framer Motion
